PROFILE

Graduate of computer science with experience working across the full-stack of software development. Seeking a role that offers opportunities for growth and learning from experienced team members, while leveraging my successfully executed project experience. Dedicated to continuous learning and professional growth in a dynamic and challenging environment.

PROFESSIONAL EXPERIENCE

Intern Software Engineer R&D Arch & Eng

Bangalore, India

Onsolve

- Developed a web application with comprehensive CRUD functionality utilizing React, HTML, and CSS.
- Automated 100% of the Travel Service API using C# and SpecFlow, significantly improving testing accuracy and reducing manual testing efforts.
- Automated Organization Service APIs using the Selenium framework, ensuring robust and reliable test coverage.

Salesforce Developer

Bangalore, India

Perfaware

- Developed and customized Salesforce applications to meet client-specific requirements, ensuring high functionality and user-friendly interfaces.
- Implemented and configured Salesforce objects, fields, workflows, validation rules, and custom reports to optimize business processes.

PROJECTS

Surfeit

Food Delivery APP

Developed a cross-platform Food Delivery app using React Native, HTML, and CSS. The app enables users to browse restaurants, view menus, place orders, and track deliveries with an intuitive and visually appealing interface.

Game Development Projects using Unity Engine

Pong, ZigZag and Fruit Ninja

- Pong: Developed a classic Pong game using Unity and C#, featuring smooth paddle movement, collision detection, and score tracking.
- Fruit Ninja: Created a Fruit Ninja clone in Unity with C#, implementing touch controls for slicing fruits, animations for cutting effects, and a scoring system.
- Zig Zag: Built a Zig Zag game using Unity and C#, incorporating procedurally generated paths, responsive tap controls.

Currency Converter

Currency Converter App using WPF

Developed a WPF-based Currency Converter app with functionality for static data, database, and real-time data from an external API. Ensured seamless UI and backend integration for accurate and efficient currency conversion.

Kayaka

Application for finding local jobs and connecting people

Developed an Android application to help users find local jobs, utilizing Java, Android Studio, and Firebase for real-time data storage and retrieval.

Smart Gym

Gym Management System

Created a web-based Gym Management System app using JavaScript, HTML, and CSS. The app facilitates membership management, class scheduling, and tracking of workout progress with a user-friendly interface.

EDUCATION

Bachelor Of Technology In Computer Science And Engineering

Mangalore Institute Of Technology And Engineering

2018 – 2022
Mangalore, India

Higher secondary education

Bharatiya Vidya Bhavan School

2017 – 2018
Calicut, Kerala

SSLC

Bharatiya Vidya Bhavan School

2015 – 2016
Calicut, India

SKILLS

Languages

- Java
- C#
- C++
- Apex
- JavaScript
- Json

Databse

- SQL
- NOSQL
- SOQL

Tools & Framework

- React & React Native
- .NET
- Specflow
- selenium
- Katalon
- Jira
- Git
- AWS
- Eclipse
- Visual Studio Code
- Visual Studio 2022

CERTIFICATES

AWS Aolution Architect Associate

Cloud Computing With AWS

LinkdIn Learning

- Inclusive Mindset
- Improve Your Listening Skills
- Personal Branding on Social Media
- Safety and Inclusion at workspace
- Preparing for Review
- Project Management Reinvented for Non-Project Managers
- Project Management Simplified
- Communicating Across Cultures

GUVI UIPath

- Orchestrator for RPA Developers
- UIPath Apps
- Gets started with RPA Development
- Variables, Arguments and Control Flow Studio
- Step into RPA
